Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 23 October 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Acknowledgment of Papers Received: Request for Continued Examination entered 10/23/03.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Meyer et al (WO 97/17978 hereafter referred to as '978). The claims are drawn to a method of ameliorating headache pain comprising applying a topical formulation comprising nonsalicylate NSAID to the forehead.

3. '978 discloses a method of relieving headaches by applying a topical formulation to the forehead, temple and occipital regions of the human head (examples 3-5, Cases 6 and 7). The topical formulation can be in the form of lotions, creams or transdermal pads (pg. 17, lin. 3-6). The active agents include acetic acid derivatives such as diclofenac, indomethacin, ibuprofen, and ketoprofen (claims 7 and 8). These disclosures render the claims anticipated.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

Art Unit: 1615

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

6. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

7. Claims 19-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over the disclosures of Meyer et al (WO 97/17978 hereafter referred to as '978). The claims are drawn to a kit comprising the formulation of the invention and instructions for practicing the method of claim 1.

8. As discussed above, '978 discloses formulations for the amelioration of migraine headaches topically. The reference also includes other applications in multiple cases studies. The patients in the case studies were given kits comprising a dosage form and instructions of how to use the dosage form (Case 5). Though the instructions were for a buccal administration,

Art Unit: 1615

it can be assumed that instructions were given to each patient in the study regardless of the application situs and symptoms. Further it is a well-established practice to include instructions in commercially available topical analgesics purchased with or without a prescription. Such as Ben-Gay® or Tiger Balm®.

9. With these things in mind it would have been obvious to follow the suggestions of '978 to include instructions with all of their dosage forms in order to safely instruct patients on proper use. It would have been obvious to a skilled artisan to follow these suggestions along with those trends established by commercially available products with an expected result of a kit comprising instructions and a topical analgesic.
